About Smart Lifestyle Solutions

Smart Lifestyle Solutions is a registered NDIS provider specialising in Home modifications, accessibility solutions, home automation and assistive technology. We work collaboratively with Occupational Therapists, participants, families and support providers to deliver practical solutions that improve safety, independence and quality of life.

Our focus is simple:

We help people live more independently in the homes they know and love.

Why Partner With Us?

Collaborative Approach

We work alongside Occupational Therapists and support teams.

Technical Expertise

Practical solutions backed by industry knowledge and experience.

Participant Focused

Every recommendation is tailored to participant goals and needs.

Compliance Focused

Delivered in accordance with applicable standards and requirements.

Registered NDIS Provider

Committed to quality, safety and participant outcomes.

Ongoing Support

Training, maintenance and future upgrade support.

Our Collaboration Process

Example Projects

Maroubra - Private Home

The Challenge:

A participant in a wheelchair was unable to leave home unassisted, because he couldn't open and close the front door and gate. He also had difficulty operating lights because of the height and location of the switches.

The Solution:

- Automated front sliding gate
- Widening of front doorway
- Automated front door
- Automated lighting control
- Home network improvements
- Integrated voice control for lighting and automatic doors
- Mobile app and RF remote control for lighting and doors
- Integration of door and gate with video intercom system to allow access via PIN code for family members

The Outcome:

The participant is able to leave home independently, confident that he will be able to exit and enter his home unassisted. Voice control, remote controls and a mobile app enables the participant to control lights and doors with ease.

Marayong - Private Home

The Challenge:

A hearing impaired participant was unable to hear visitors at the front door. She was also at risk, as there was no suitable system to warn her in the event of a fire

The Solution:

- Automated lighting control
- Video intercom
- Smart integration of smoke alarm system
- Integration of smoke alarm with lighting system, to provide a visual warning for smoke alarm activation
- Integration of intercom with lighting system, to provide a visual notification when a visitor rings the doorbell
- Mobile app with haptic feedback for intercom notifications
- Mobile app for lighting control

The Outcome:

The participant is notified when a visitor rings the doorbell and she is able to view the visitor using the mobile app. She is safer in her home, knowing that smoke alarm activations are accompanied by flashing lights

Ingleburn - Private Home

The Challenge:

A mobility impaired participant required assistance with controlling lights, fans, air conditioning systems and entertainment systems.

The Solution:

- Automated lighting control for bedroom and bathroom
- Automated control for bedroom fan
- Integration with airconditioning system in bedroom and living room
- Integration of air purifier
- Integration of smart TV
- Setup of voice control for automated systems

The Outcome:

The participant is able to control the important electrical systems in her home independently, using an app and voice control.

Sutherland - SDA Home

The Challenge:

A participant with significant disability was unable to open the door to his room and also had difficulty calling for help

The Solution:

- Automated internal door including electrical work and modification of the door frame to accommodate the door operator
- Remote control and wall mounted pushbuttons for operation of the automated door

The Outcome:

The participant is able to enter and exit his room unassisted

Who We Work With

- Occupational Therapists

- SIL and SDA Providers

- Support Coordinators

- Builders

- NDIS Participants

- Families and Carers
